To whom It May Concern,

Customer's inquire about compliance to NEMA 410-2015

We have received more and more inquire about compliance with this standard. However, the standard is not a product performance certification standard. Therefore, compliance to this standard does not apply.

This is the note from NEMA customer support: *"NEMA 410- 2015 Performance Testing for Lighting Controls and Switching Devices with Electronic Drivers and Discharge Ballasts standard is not a product performance certification standard but a standard for the testing equipment used for that purpose. For any certification you would need a product standard or a specific requirement regarding what load to simulate and also what the pass/fail criteria are."*

Also, it is intended for "Lighting Controls and Switching Devices" and not to standalone LED drivers.

More information can be furnished upon request.

Sincerely,
