

# ZGW-A001

ZGW-A001 is a miniature form-factor gateway that can be directly plugged into AC receptacle. It is easy to commission, easy to use and easy to control yet; it is powerful to control and provide adequate communications to up to 60 end node devices. The idea is to support small to medium size spaces with easier installation and integration. The ZGW-A001 is designed to deliver intelligent local control and bridge into larger scale networks. Its physical form-factor provides the most convenience and flexibility in the greater networking environment.

## Key Features:

- Unique device for connecting to internet
- Full range input from 100VAC – 264VAC wall-pluggable form-factor
- High interoperability in compliant to global Zigbee standards
- Start-of-the-art algorithms providing adequate communication up to 60 end node devices
- Easy commissioning, easy to use and easy to control
- Standard Zigbee OTA makes updating easy and current

Specifications	
Compatibility	Zigbee H.A 1.2
Input	100 - 264VAC/50-60Hz
Operating Environment	-20 - +65°C
Radio Properties	2.4GHz Transmit Power +19.5dBm
I/O Port	1 x 10/100 Mbps Ethernet (Optional)
Warranty	5 year

Indicator and output functions	
LED Indicator	Red (Power On) Green (ZigBee Coordinator Started)
RST	Reset Button
