

Notification of Dimming Wire Color Change

Dear Valued Customers,

Starting on October 1st, 2021, Magtech Industries Corp. will start the process of making changes to the color of the –DIM wire from GRAY to PINK. The process will continue through the last quarter of 2021. All of our designs will be fully in compliance before the deadline of January 1st, 2022.

The NFPA 70, National Electrical Code (USA, NEC 2020) disallows GRAY color to be used for the CONTROL WIRES.

The National Electrical Manufacturers Association (USA NEMA) decided to use PINK instead of GRAY for the control wire (-DIM).

Please, do not hesitate to contact me if you have questions or concerns.

Regards,

Desta Edosa
